Today we're gonna talk about how to plan a really simple budget for yourself!

### MAGGY'S SUMMER BUDGET!

_____	→	\$
_____	→	\$\$
_____	→	\$\$

You can do this lots  
of different ways,  
this is just a really  
simple way to plan  
out how you  
save + spend, no  
matter how much  
you're making!

So first you wanna figure out how much you'll make in a month, and what your goals are with that money.

It's totally cool if its super simple, just map out anything you'll want to save for.

Usually it's good to have a long term goal you put a little money into at each paycheck, a specific ongoing goal that you know you'll want money for, and some leftover fun money. Put a little into all of them as you get paid!

Happy budgeting!
